High-quality lens cloth made of P-9000®-Microfiber rPET for gentle cleaning of spectacle lenses and optics. The microfibre, specially developed for sensitive surfaces, ensures streak-free cleaning of the lenses. It reliably removes greasy dirt such as fingerprints, gives your glasses a flawless shine and provides a clear view.
Application
Preferably use mist-damp or dry. The glasses should be dust-free.
Small particles of dirt can damage the lens.
Please refer to the care instructions of the spectacle manufacturer.
After use, always keep the cloth dust-free in the packaging.
P-9000®-Microfiber rPET
(70% recycled polyester I 30% polyamid)
30
Do not use fabric softener.
